

“Businesses and organizations that are leaders in energy efficiency, use about 30 percent less energy than their competitors.”

—EnergyStar.gov

UtilityTrac™

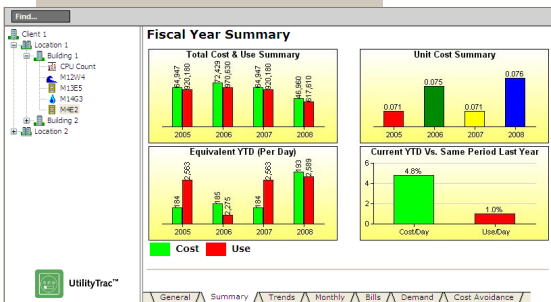

Are your buildings green?

In today's market understanding your utility consumption is just smart business as well as being a good steward of our natural resources. Imagine having data quickly at hand for predictive trending, energy conservation and supporting green initiatives!

UtilityTrac enables you to audit, track and analyze your utility consumption and cost, plus enables you to provide “value-add” services to your organization by:

- Helping them better understand their impact on energy consumption
- Identifying energy conservation opportunities
- Tracking your carbon (CO₂) footprint
- Applying for ENERGY STAR® certification
- All this and more

Features include:

- User-friendly web interface. You need only a web browser, no software or hardware to purchase or install
- Easy navigation through your facilities to your meters
- PowerViews that show usage, cost, demand
- Trend charts and graphs that are automatically updated that enable simple comparison and analysis of utility data
- Automatic submission of your building data to ENERGY STAR Portfolio Manager and records the EPA rating results
- Carbon (CO₂) foot printing by calculating and tracking greenhouse gas emissions from direct and indirect energy sources
- Energy use and cost comparisons between buildings
- Many detailed reports

ENERGY STAR Input	Value
Zip code	27821
Gross floor area	45000
Weekly operating hours	10
Number of occupants	25
Number of PCs	20

ENERGY STAR Rating: 75

How it works

You will have access to your data via a secure web interface. We will partner with you in managing your utility cost with UtilityTrac. There are a variety of service offerings that range from us acting as your energy analyst to that of you performing that function on your own, or anything in-between.
